

**NOTICE  
CITY OF IRON RIVER  
HYDRANT FLUSHING**

The City of Iron River will be flushing water lines and fire hydrants starting Monday, September 9, 2019, and concluding on Friday, September 20, 2019.

Residents may notice some discoloration in their water as a result of this activity. If this occurs, let the water run until it clears. One might smell a slight hint of chlorine that is used in the process. Also, in some instances, aerator screens in faucets may clog giving the impression that there is no water. Removing and cleaning of the screens will usually solve the problem.

CHECK WATER CLARITY BEFORE WASHING CLOTHES
